

FOR PARENTS

of MS/HS students in
grades 7-12*

“ The median age for first time
users of steroids is 15.

Over 1.5 million teens admit
to using anabolic steroids.”

Free Admission

Don't miss Hoot's Chalk Talk!

Speaker Don Hooton Sr. and his family founded the Taylor Hooton Foundation in 2004, the year following the loss of their son Taylor, a high school athlete who suffered the side effects of anabolic steroid use and withdrawal. Hear Mr. Hooton as he raises awareness about the problem of appearance and performance enhancing drug use by middle and high school youth.

Recognize the dangers!

Are dietary supplements, energy drinks, and protein supplements safe?
What are the potential dangers of steroids and the physical effects for males and females?
What injuries are associated with it?

Find the answer to many of these questions at "Hoot's Chalk Talk":

- Energy drinks / shots
- Pre-workout supplements
- Human Growth Hormone (HGH)
- Anabolic Androgenic Steroids (AAS)
- Protein supplements
- Creatine
- Body Image and self esteem

For more information, go to manhassetcasa.org and please like us on Facebook.

* MS/HS students will see Hoot's
Chalk Talk at 3:30 pm.
